Joanna ❤ ❤ ❤ - my Wife!

and a lot of other stuff like

Computing, Programming, Developing, Open Source, Beta testing

Video Games ❤, Tabletop Games, Fantasy, Books, Movies, etc.

A new job?

To sum it up, I'd love a position where I can use my skills to make an impact that will be recognized. The position is only part of the equation, being at the company where I can grow and work towards something that matters is a big deal to me.

I am always eager to learn and ready to take on new challenges. I'd like to think, I will be able to take on more responsibility, therefore a company which provides training and supports any growth opportunities, would be an ideal place for me.

I'd like to learn new programming languages. Deeply interested in exploring python or ruby, would love to know Golang a bit better and give some front-end frameworks like React, Vue.js or Meteor a proper go.
